Creating a Venture Capital Model for the Region

Solution

Create economic value and national wealth through entrepreneurial activity

Need to fund entrepreneurial ventures that create value
Creating a Venture Capital Model for the Region – a Best-practice Approach

Creating a Model - Options

• Model must be informed by the economic cultural and legal characteristics

• Create a model in which the stimulant is an increase in institutional and private capital

• Create a model which focuses on participation of a wider stakeholder group
Creating a Venture Capital Model for the Region

Possible Approaches

One or more of the following sources may be utilised

- Institutional and angel investors
- State
- Public/Private Partnership
- Financial VF
- Corporate VCF
Proposed “Fund of Funds” Model

Level 1 Investor
$ Government --> Institutional Investors

Private Equity Capital Corporation (PECC)

Level 2 Investors
Individual Investors

Community Private Equity Fund
Community Project

Creating a Venture Capital Model for the Region – a Best-practice Approach

Creating a Model

i. There is no one model applicable to the region

ii. Several models can co-exist all tailored to meet the needs of the investor and the entrepreneurial firm

iii. Whatever the model there should be a win-win scenario; growth and profitability for the firm and an ROI for venture capitalist commensurate with the risk taken
Creating a model

• Adequate Supply of Funds
• Fund Structure and Management
• Adequate Deal Quantity and Quality
• Market information – Valuations, Due Diligence and exit
• Individual and Institutional Capacity
• Supporting Infrastructure
Creating a Venture Capital Model for the Region – a Best-practice Approach

Creating a Model

• Utilize technology in the VC Process - information, education, networking, fund formation and deal generation
Creating a Venture Capital Model for the Region

The Way Forward

i. See VC as part of a larger socio, economic & political system

ii. Create a financial market structure and architecture conducive to VC activity

iii. Ensure correlation between entrepreneurship, legal & policy framework, education system and supporting institutions
Creating a Venture Capital Model for the Region

March 2014 CCN TV6 ,T&T

A man stands on the beach front near his home observing and lamenting the erosion of significant acres of beachfront

“The sea is taking our land and it happening at a rapid rate, our houses are being destroyed and crops are being wiped out, I think this has to do with climate change, global warming. What can we do”?
Creating a Venture Capital Model for the Region

The foregoing slide illustrates the nature of some of the challenges which face the region and the need to adopt a solution-oriented approach.

The statement by the resident reiterates the need to address issues of Global warming, Agriculture and Alternative energy among other areas for which the venture system and wider entrepreneurship system must play a significant role.
